

If your provider has ordered Breast Cancer Index® for you, or is considering ordering the test, you may have a few questions. . .

What is Breast Cancer Index And How May It Be An Important Test For Me?

Breast Cancer Index may help you and your healthcare team decide whether extending your anti-estrogen treatment beyond year 5 is right for you by telling you:

- 1) Whether staying on your anti-estrogen therapy beyond 5 years is likely to reduce the risk of your breast cancer returning ("recurrence")
- 2) Your individual risk of distant recurrence beyond 5 years if you don't continue your treatment.

The Breast Cancer Index results will allow you and your healthcare team to work together and make a more informed decision about the next steps in your extended anti-estrogen treatment plan.

Learn more about anti-estrogen therapy decision-making beyond 5 years and Breast Cancer Index at BreastCancerIndex.com

What Happens Next?

Now that your doctor has ordered Breast Cancer Index, the test will be run based on the provider's request. Please expect a courtesy call from a Biotheranostics Patient Service Associate who will walk you through what to expect during the billing process.

Please ensure you return their call, as they will assist you with understanding your potential financial out of pocket and discuss Biotheranostics' financial assistance program.

Throughout the process, our Patient Services Team is available to assist you with questions and concerns.

How Much Does The Test Cost?

- The test is covered by Medicare with no co-pay or deductible for patients who meet the coverage criteria.*
- Breast Cancer Index is reimbursed by many commercial insurance companies.
- Through the Breast Cancer Index Access First program, financial assistance is also available for those who qualify.

As with all health-related visits, tests, or procedures, you should be aware of your deductibles and co-insurance responsibilities.
